EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 1, line 2, after "including" replace the word "an" with --a--

In claim 2, line 2, after "including" replace the word "an" with --a--

REASONS FOR ALLOWANCE

The Amendment and Remarks filed May 9, 2008 have overcome the rejection set forth in the Office action sent January 9, 2008.

The art of record does not anticipate or make obvious the limitations of an apparatus for simulating a pulse and correlated heart beat of an animal including a human, the apparatus comprising a playback device for generating a first electronic signal corresponding to a pulse and a second electronic signal corresponding to a correlated heart beat; an electronic tactile pulse simulator for receiving the first electronic signal and generating pressure pulses simulating an arterial pulse discernible by touch; and an audio simulator for receiving the correlated heart beat signal and recreating the heart beat to be heard through a standard stethoscope, and wherein the first and second electronic signals are generated from recordings of living animals including humans and wherein the simultaneous generation of correlated heart sounds

and touch discernible arterial pulses is sufficient to allow training of medical practitioners to discriminate between normal cardiovascular function and abnormal cardiovascular function (as per claim 1).

Further, the art of record does not anticipate or make obvious the limitations of an apparatus for simulating a right side pulse and a left side pulse and correlated heart beat of an animal including a human, the apparatus comprising a playback device for generating a first electronic signal corresponding to the right side pulse; a second electronic signal corresponding to the left side pulse and a third electronic signal corresponding to a correlated heart beat; a first tactile pulse simulator for receiving the first electronic signal and generating pressure pulses simulating a right side arterial pulse discernible by touch; a second tactile pulse simulator for receiving the second electronic signal and generating pressure pulses simulating a left side arterial pulse discernible by touch; and an audio simulator for receiving the correlated heart beat signal and recreating the heart beat to be heard through a stethoscope (as per claim 2), in combination with other presented limitations.

Furthermore, the art of record does not anticipate or make obvious the limitations of an apparatus for simulating a right side pulse and a left side pulse and correlated heart beat of a human, the apparatus comprising: a playback device for generating a first electronic signal corresponding to the right side pulse, a second electronic signal corresponding to the left side pulse and a third electronic signal corresponding to a correlated heart beat; a first housing including a first tactile pulse simulator for receiving the right side arterial pulse signal and generating pressure pulses corresponding to a

right arm arterial pulse discernible by touch; a second housing including a second tactile pulse simulator for receiving the left side arterial pulse signal and generating pressure pulses corresponding to a left arm arterial pulse discernible by touch; and a third housing including an audio simulator for receiving the heart beat signal and generating an audible recreation of the correlated heart beat and designed to be heard through a stethoscope position on a surface of the housing, wherein the first and second electronic signals are generated from recordings of living animals including humans and wherein the simultaneous generation of correlated heart sounds and touch discernible arterial pulses is sufficient to allow training of medical practitioners to discriminate between normal cardiovascular function and abnormal cardiovascular function (as per claim 25).

Claims 1, 2, 8-10, 14-16, and 25-27, therefore, are allowable.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
